

Authority and Supersession Note

Read before Monograph I. One page. Frozen 16 July 2026.

The monographs of this corpus are frozen byte-exact and are never silently edited. Monographs I (Main and Compact editions, dated 15 July 2026) therefore still carry the pre-closure numerical architecture in their formula ledgers. Monograph III — The Closure (16 July 2026) supersedes those constructions wherever the two differ. This note states the supersessions explicitly, so that no reader mistakes a preserved historical formula for the governing one.

Quantity	Monographs I / I-Compact state	Monograph III governs
Vacuum record	registered as r^{241} (“240-step traversal + record”)	$\lambda\partial = (4\pi/\sqrt{3})\cdot r^{240}$ — the +1 is one codimension-one boundary readout, never another factor of r
Late-time clock	$H_0 = 72.1 \text{ km s}^{-1} \text{ Mpc}^{-1}$ (external choice, §18.2)	$H_0 = 67.3617174547 \text{ km s}^{-1} \text{ Mpc}^{-1}$ — derived from the Λ closure and Ω_{DE}
Interface scale	$a = cH_0\Delta B = 6.9086 \times 10^{-11} \text{ m s}^{-2}$ (§18.7)	$a(z) = \sqrt{3}\cdot c\cdot H(z)\cdot \Delta B$; $a_0 = 1.117959 \times 10^{-10} \text{ m s}^{-2}$ — measure-neutral coefficient, zero parameters
Edition architecture	“Final Two-Paper Edition”	the frozen Three-Monograph Corpus Edition (I · II · III)
Proof status of any claim	per-section grades	the Proof Ledger (Monograph III, Appendix): assumptions A_1 – A_{11} , dependency map, kill conditions
Frozen predictions	—	$P_1 \cdot P_2' \cdot P_3 \cdot S_1$, with named kill conditions

Everything else in Monographs I and II — the physical source model, the internal reconstruction, Primordial Loop Algebra, the metallic ladder, the observational standard, and the claim-grade discipline — stands as written and is not superseded. The discovery-order account in Monograph I remains the correct history: it records how the closure was found, including the r^{241} reading and the external clock that Monograph III later corrected and derived. Where any formula, constant, prediction, or proof status differs between documents, the order of authority is:

Proof Ledger (III, Appendix) > Monograph III > Papers as Issued > Monographs I–II
